Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following office action is responsive to the amendment filed June 17, 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4-11,13-20 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Porter ('654).

Porter discloses a torque transmission apparatus (Fig. 2), a differential assembly (Fig. 4), a differential case (110), at least one output shaft (54), a friction clutch (114), a hydraulic clutch actuator (Fig. 5), a hydraulic pump (78), a hydraulic pressure accumulator (104), a housing (123), a drive pinion (220), a pinion shaft (54), a directional valve (136), a piston assembly (128), a reservoir (100), a solenoid control valve (72), an electronic module (68), and anti-lock braking system (150A-150D). Since no structure is associated with the recitation of the differential and noting that the device depicted in Fig. 4 allows differential rotation, it should be noted that for rejection purposes the coupling shown in Fig. 4 is considered a differential.

Conclusion

The arguments regarding Porter in the amendment filed June 17, 2005 have been fully considered but are not deemed persuasive.

Regarding applicant's assumption that a differential requires a system of gears, the examiners respectfully disagrees. As it is well known in the drivetrain art that gearless differentials are known alternative to the gear-type. Therefore, for examination purposes, gears are not considered to be implicitly recited as a claim limitation. Therefore, since the prior art discloses what is commonly known as a center differential and teaches the claimed components, the rejection is deemed proper.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
